9/2023 | **Software Engineer** *Devices & Services Product Area (DSPA)*
12/2019 | **Google** Central Test Engineering *San Francisco Bay Area (Mountain View)*

- Architected an ML system to make Nest and Pixel factory data more insightful and actionable
  - Pioneered **6** novel ML use-cases, across **7** programs, with accuracy up to **98.5%**
  - Example pipelines include clustering common failures from previous products, classifying said failures in future products, and using regression to produce new metrics or replace old ones
- Founded or co-founded efforts to scale software within entire organization: documentation overhaul (**350 new users/month, 750 new sessions/month**), boost software testing (**hundreds of new test cases**), test station adoption org-common or team-common libraries (**code reduction up to 70%**)
- Implemented initial factory data downloader (adopted by org, external teams), common audio test framework (entire team), and lead forums for knowledge sharing (team participation)
- Factory audio software DRI for Nest Cam, Pixel Tablet, Pixel Buds Pro
  - **Saved $120k in program capex** by optimizing Nest Cam (**52%**) and Pixel Tablet (**23%**) test time
  - Nest Cam's test script was **fastest (by ∼ 36%) within Google audio** during entire tenure

7/2018 | **Garmin** Safety & Datalink *Greater Kansas City Area*

- **Lead system testing effort to meet DO-178B compliance** on GDL-60
  - Designed new test architecture, supported test infrastructure, and wrote test plans
- Implemented embedded software to synchronize configuration between two operating systems

7/2018 | **Software Engineering Intern** *Aviation*
8/2017 | **Garmin** Interfaces/Data Routing *Rolla, MO*

- Implemented quality-of-life improvements for a highly-utilized aviation tool
- Implemented validation system for said tool, resulting in **25%** **code reduction** in affected classes
