- Architected an ML system to make Nest and Pixel factory data more insightful and actionable
 - Pioneered **6** novel ML use-cases, across **7** programs, with accuracy up to **98.5%**
 - Example pipelines include clustering common failures from previous products, classifying said failures in future products, and using regression to produce new metrics or replace old ones
 - Founded or co-founded efforts to scale software within entire organization: documentation overhaul (**350 new users/month, 750 new sessions/month**), boost software testing (**hundreds of new test cases**), test station adoption org-common or team-common libraries (**code reduction up to 70%**)
 - Implemented initial factory data downloader (adopted by org, external teams), common audio test framework (entire team), and lead forums for knowledge sharing (team participation)
 - Factory audio software DRI for Nest Cam, Pixel Tablet, Pixel Buds Pro
 - **Saved \$120k in program capex** by optimizing Nest Cam (**52%**) and Pixel Tablet (**23%**) test time
 - Nest Cam's test script was **fastest (by ~ 36%) within Google audio** during entire tenure
