9/2023 **Software Engineer** *Devices & Services Product Area (DSPA)*

12/2019 **Google** Central Test Engineering *San Francisco Bay Area*

- Architected an ML system to make Nest and Pixel factory data more insightful and actionable
 - Pioneered 6 novel ML use-cases, across 7 programs, with accuracy up to 98.5%
 - Example pipelines include clustering common failures from previous products, classifying said failures in future products, and using regression to produce new metrics or replace old ones
- Founded or co-founded efforts to scale software within entire organization: documentation overhaul (internal 350 new users/month, 750 new sessions/month), boost software testing (hundreds of new test cases), test station adoption org-common or team-common libraries (code reduction up to 70%)
- Implemented initial factory data downloader (adopted by org, external teams), common audio test framework (entire team), and lead forums for knowledge sharing (team participation)
- Factory audio software DRI for Nest Cam, Pixel Tablet, Pixel Buds Pro
 - Saved \$120k in program capex by optimizing Nest Cam (52%) and Pixel Tablet (23%) test time
 - Nest Cam's test script was fastest within Google audio (by 36%) during entire tenure
 - Nest Cam was Nest's first fully-remote program, from PROTO to MP
